CONSULTING ENGINEERS

# WHAT COULD YOUR SCHOOL DO WITH A **FREE \$15,000?**

**The State of Michigan wants to give you  
FREE MONEY to make your schools more  
energy efficient.**

School administrators have a tough job; making sure their buildings are safe, reliable, and energy-efficient while not interfering with the education of the future minds of students in Michigan.

However, the pandemic has changed the game, and budgets are tight. **Where can schools get more funding to make sure their school buildings are operating safely and at maximum energy efficiency?** It's hard enough maintaining students and staff. Who has time to research their building's compliance and energy usage? Or where can administrators find the resources to launch energy projects when they're barely keeping their heads above water with school projects?

For more program  
information from the  
State of Michigan

The State of Michigan is offering \$15,000 to K-12 schools to perform a high-level energy audit for their facilities. The Community Energy Management Incentive Program will provide a starting line for administrators to begin the energy-efficiency journey that aligns with their district goals.

Synergy Engineers has helped other K-12 schools realize their energy potential by performing energy audits that reveal the true Return on Investments (ROI) for energy-related projects. Whether the school needs benchmarking, ASHRAE Level I or II audits, energy efficiency upgrades, renewable energy projects, training, or workshops, Synergy can help come alongside administrators to sift through the confusion and pinpoint their best course of action for optimal safety, reliability, and energy efficiency.

### Our Plan is Simple:

-  **Talk to Us** We are advocates for your school and want to hear about your energy goals. (Scan the QR code below to set up a time to talk with us or email Brad at [bradb@synergy-engineers.com](mailto:bradb@synergy-engineers.com))
-  **Determine Eligibility** We will do the heavy lifting to make sure you're eligible for the free \$15,000. If you're not, there are many other incentives available that we can explore together.
-  **Sit Back + Relax** We'll take care of all the details including developing the proposal, submitting it to the state, and getting your energy management plan in place.

It's not too late to get your projects for 2021 underway and funded before time runs out. Scan the QR code below to schedule a time to talk with us to find out if you're eligible. A free \$15,000 for your school will get you started down the road of energy efficiency as well as new awareness of other incentives that may be available for your buildings. We're eager to come alongside you and help you craft an energy management plan and advocate for your building needs.

Energy consumption is on the rise and the high cost of doing nothing now could be painful for the school budget later. Investing in energy savings now could save your district dividends in the long run, as well as making your schools safer and more reliable. A simple email to Synergy could be worth \$15,000. Get in touch with us today.
